WiSACWIS Release Notes

Build 218 Release 2.4

Person Management

1. If a user updates a participant's address information, only the current primary address will be updated.

Financial

1. Overpayments for placements will now calculate correctly. Basic, supplemental and administrative amounts will now be included in the overpayment.

2. The Service Type dropdown will now be filtered correctly for manual payment requests.

3. The Assets section of the CFS-205 (section 2) template is now prefilling correctly.

4. The mailing address is prefilling correctly on the CFS-75.

Licensing Home Providers

1. If the user has the license template open, the system does not allow the user to exit the Home Provider License window without first saving and closing the license template.

2. If the user ends a license and then creates a new license and approves it before the supervisor approves the old license, the old license is automatically approved and closed.

Home Inquiry

1. When a Parent1/Parent2 is removed from a provider, users are now able to create a new provider using the removed participant.

Intakes

1. If the 'Court Ordered Study' checkbox is checked and the 'Date Report Due in Court' is populated, the information is now saved and viewable to supervisor.

2. The 'Source' information is now saved and is viewable to supervisor.

3. StepParent is now a selection for relationship when setting up Kinship Care case.

4. If intake has multiple participants (enough to enable a scroll-bar to the right of participants to scroll between), scroll-bar is now enabled.

Case Maintenance

1. The 'Site/Region' field will now default to State Central Region if worker does not update it properly.

Case Merge

1. System will not allow cases to be merged if they are already set up for the case merge process (users will receive message that cases are already set up for merge process). For example; if worker sets up Case A to merge with Case B and another worker tries to merge Case B with Case A; message will generate and system will not allow the second merge.

Search

1. No longer able to change mailing address for provider using Search – user must be assigned to provider to make the change.

Assessment

1. Performance has been improved on the 'Initial Assessment Site Activity By Month' report.

2. Application will not hang or loop on any tabs when a parent or child is added after the Initial Assessment - Primary Caregivers has already been created.

3. The system will prompt the user to save or cancel changes if they try to close the Initial Assessment - Primary Caregivers window.

4. Spelling Errors have been corrected on the Initial Assessment – Primary Caregivers window.

Safety

1. The Monthly Cause Analysis template is updated each time it is executed to reflect the changes made to the questions on the Safety Assessment window.

Document Plans

1. The information from the Ongoing Permanency Plan (Historic) is brought over to the new Pending Permanency Plan.

2. The Treatment Plan window and template will populate with data from the correct case/family.

3. When a user has multiple sessions open and tries to close one of the WiSACWIS session, the system will not delete the temporary files if there is still a WiSACWIS session open.

4. The Adoption Case Plan Maintain Item Pop Up window displays the correct error message when trying to end a Project with a date greater than the current date.

5. The Treatment Plan window has the correct information displayed on the Plan tab for the participant selected on the Outcome tab.

6. The Permanency Plan template has been modified to:

- increase the size of the Site Number field
- include the commas for names as part of the bookmark so that they can be deleted by the user if there is no name to pre-fill
- ensure that bookmarks that accept many lines of data are printing between the margins
- move the signature names so that they appear directly on the lines

7. The Adoptive name field on the Recommendation of Adoption template is a user-entered field versus being pre-filled from a window.

8. The Petition Request for Determination of Status in Need of Protection or Services- Non-Emergency no longer allows field text to extend beyond printable margins.

Out of Home Placements

1. A supervisor can approve placement endings.

2. A user cannot conclude an Adoption Agreement without first selecting a provider.

3. The Adoption Assistance Amendment Amended amount is calculated when the user saves the window or when the user tabs from the Additional $ per month field.

Adoption Referral

1. System Administrator error is not displayed if Microsoft Word is opened when trying to execute the Adoption Acceptance Letter.

Ticklers

1. When a child is TPR'd from the biological family case, two ticklers are created: "Adoption Case Plan for TPR" and "Order of Adoption Completion TPR". The "Order of Adoption Completion TPR" has been changed to "Review Option to Return Custody to Cnty". However, the "Review Option to Return Custody to Cnty" tickler still not appear until close to 2 years after the child has been TPR'd.
